TO WHOM IT MAY CONCERN

General Electric International Branch has been working with K & K Accounting from the foundation of the branch in Bulgaria in 2005 till now.

K & K Accounting took over the setup of the accounting and the payroll of the new founded branch from the scratch. They have organized the local chart of account following our needs for monthly detailed DR reporting to our headquarters in US. In 2007 K&K Accounting supported us to bring the accounting processes in house with a smooth transition. From 2009 K&K is providing to GE a leased accountant as backfill of our statutory senior accountant who is on prolonged maternity leave. K&K leased employee has integrated successfully in the position and has become key member of our accounting and financial team aligning the raised standards of GE and K&K.

Overall the service of K & K Accounting can be ranked as excellent as meets our highly set up requirements for detailed internal reporting and control together with statutory and tax compliance. K&K's flexible approach, digitalization and control of the accounting process are of big help in terms of optimizing of our processes & resources.

Our experience working with K&K Accounting shows that the firm is constantly meeting our expectations of the service level proving high integrity together with the core values of GE - to be accountable and resourceful counterparty for our business in Bulgaria.

Do not hesitate to recommend the firm as reliable accounting partner to the business.
